High performance sustainable carpet backing

Colback® Green

Colback Green is the name of a range of high performance primary backings developed to enhance the environmental sustainability of the carpet industry.

All Colback Green nonwovens are made of 100% sustainable raw materials. Building on the success of Colback SMR, Colback Green contains post-consumer recycled polyester and polyamide-6 generated from carpet waste. Cutting-edge polymer engineering added to intensive in-house R&D form the foundations of Colback Green primary backings, which bring the same high performance as virgin content variants.

Colback Green product range

Weight range:

70-120 g/m²

Colours:

Gray (RG-types) and black (RB-types)

Colback Green performance

Colback Green delivers the same high performance as traditional Colback types:

- Superior dimensional and thermal stability
- Outstanding tensile strength and tear resistance
- Excellent affinity to coatings, bitumen and PVC
- Non-fraying
- Uniform and consistent open structure
